

The Challenge

- https://access.redhat.com/documentation/en-us/openshift_container_platform/3.7/html/upgrading_clusters/upgrading-blue-green-deployments
- <https://opensource.com/article/17/5/colorful-deployments>

Questions: 1-15 (1pt each)

- Q1. What is the relationship between the command oc (cli) and MiniShift (OpenShift)
- Q2. What is the relationship between OpenShift and Kubernetes?
- Q3. In the world of OpenShift, what is a project and a namespace?
- Q4. In your own words, what is kubernetes and why is it useful for DevOps?
- Q5. Can more than one projects have the same name, why(not)?
